QUALITY POLICY

It is the policy of cellasys know-how to design, develop, manufacture and deliver on-schedule safe and effective products and services that meet or exceed customer requirements and expectations through the utilization of a quality system which applies to all corporate functions.

Our organizational goals are to manufacture and deliver solutions for microphysiometry in line with the United Nation's sustainable development goals. The goals include services as research and development, production and maintenance of organ-on-chip systems. Furthermore we are consultant for development of applications, data analysis and data interpretation.

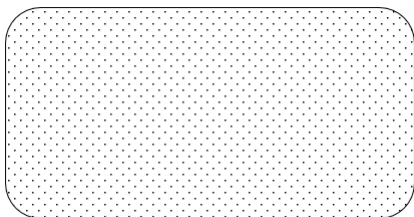

cellasys know-how recognize that the safety of people and the results of research works depend on the quality of our products and services. It is the mission of all employees, from the managing director to postgraduates, to carry out their work carefully at all times and to actively contribute to the company performance.

The Quality Manual serves to identify the quality system in effect at cellasys know-how comply with

- ISO 13485
- ISO 9001
- national and international legislation

to keep abreast with new technology.

cellasys know-how products and services are being monitored by the risk management during their entire life cycles.

Dr. Joachim Wiest, CEO
